ARCHAEOLOGY COMMENTS

Phase IA Archaeological Survey Recommendation for Buried Utilities

Project: Newbridge Convert 138kV Circuit Stewart Avenue - Ruland 138-467/567 to 345kV

PR#: 25PR02184 Date: 3/13/2025

The project is in an archaeologically sensitive area. Therefore, the State Historic Preservation Office/Office of Parks, Recreation and Historic Preservation (SHPO/OPRHP) recommends that a Phase IA Literature Search and Sensitivity Assessment survey is warranted. A Phase IA archaeological survey is designed to identify previously recorded archaeological sites and other cultural resources within or near the project area, to assess the archaeological sensitivity of the project area, to document previous ground disturbance, and to make recommendations regarding the potential need for Phase IB subsurface archaeological testing.

SHPO/OPRHP offers the following recommendations regarding the assessment of the potential need for Phase IB archaeological field testing. Phase IB archaeological survey is not recommended for those portions of the project route that are located between the edge of pavement and the far edge of an existing excavated ditch or existing utility lines, with the exceptions of alluvial settings and portions of the project route that are within the bounds of known archaeological sites. In the latter settings, Phase IB testing may be recommended for those portions of the route that fall under pavement or between the edge of pavement and the far edge of an excavated ditch.

Phase IB archaeological survey is recommended for all portions of the project route that do not fall between the edge of pavement and the far edge of an existing excavated ditch or existing utility lines and are in areas of high sensitivity. The SHPO/OPRHP defines areas of high sensitivity, where archaeological sites are most likely to be identified, as those: (1) within 100-meters (328 feet) of permanent water (rivers, streams, wetlands, ponds and lakes and hydric soils) and on slopes equal to or less than 12%; (2) within or near to known archaeological sites; and (3) locations of standing or demolished historic structures. Hydric soils are included to account for areas that may not be currently near water but were in the past. The 100-meter cut off from water is based on data presented by Robert E. Funk in his 1993 Archaeological Investigations in the Upper Susquehanna Valley, New York State. Testing should conform to the 1994 New York Archaeological Council Standards.

SHPO/OPRHP considers all other portions of the project area to have low sensitivity for the presence of archaeological sites. We have no archaeological concerns with low sensitivity areas, and we do not recommend Phase IB testing in these locations.

Our office does not conduct archaeological surveys. A 36 CFR 61 qualified archaeologist should be retained to conduct the Phase IA archaeological survey.

If you have any questions concerning archaeology, please contact Jessica Vavrasek at Jessica.Vavrasek@parks.ny.gov

CRIS: https://cris.parks.ny.gov

Are you registered to vote? Register to vote online today. Moved recently? Update your information with the NYS Board of Elections. Not sure if you're registered to vote? Search your voter registration status.

Who sent this email?

This email is a notification from the New York State Cultural Resource Information System (CRIS). CRIS is an online service administered by the New York State Division for Historic Preservation, also known as the New York State Historic Preservation Office (SHPO), which is a division of New York State Parks, Recreation & Historic Preservation.

This message pertains to a submission for a consultation project. Please see SHPO's Environmental Review web page for more information about the consultation process.

Why did I receive this email?

The submission's contact list includes your email address.

What do I need to do?

You do not need to take any action at this time. The submission is now in SHPO's processing queue.

What will happen next?

If SHPO accepts your submission, you will receive an "Initial Submission Accepted" email notification and SHPO will begin reviewing the project. That email will include the new Project Number.

If SHPO needs more information to process your submission, you will receive an "Initial Submission Found Insufficient" email with the reviewer's comments. You may then revise the submission and resend it to SHPO.

What else can I do?

Please see the following help topics for more information about managing initial submissions in CRIS:

- How do I check the status of my initial submission?
- View an Initial Submission
- Continue or Edit an Existing Initial Submission

Where can I get help?

Please visit the CRIS Online Help System: https://cris.parks.ny.gov/CRISHelp

If you still have questions about CRIS, please contact CRIS Help at CRISHelp@parks.ny.gov.

For any other questions, please call SHPO at 518-237-8643.

NYNHP

Consultation Request

April 7, 2025

VIA EMAIL: NaturalHeritage@dec.ny.gov Information Resources New York Natural Heritage Program 625 Broadway, 5th Floor Albany, NY 12233-4757

Re: Request for Project Consultation on the Newbridge Bypass Project
Town of Huntington, Suffolk County & Town of Hempstead, Nassau County, New York

Dear Recipient:

On behalf of PSEG Long Island (PSEG Long Island), as Agent for the Long Island Lighting Company d/b/a LIPA, a wholly owned subsidiary of the Long Island Power Authority, Burns & McDonnell E.G.S. (Burns & McDonnell) request NYNHP data to be utilized to site a project that will modify existing lines to bypass a substation and extend it to substation expansions on either end (Project). Work associated with the Project will occur at and adjacent to two substations in the Town of Hempstead in Nassau County and at and adjacent to a substation in the Town of Huntington in Suffolk County. A Project area location map is included as **Figure 1**.

PSEG Long Island anticipates tree clearing and trimming outside of Stewart Avenue Substation, Newbridge Substation and Ruland Road Substation to accommodate the Project. PSEG Long Island is committed to working with relevant agencies to prevent impacts to possible Northern Long-eared Bats in the area. Coordination with NYSDEC will be conducted, as required, prior to clearing. A restoration plan will be developed as part of the Project.

The Project will be subject to New York State Public Service Law as an amendment to existing facilities certified under Article VII. We are submitting this project review package for technical assistance to bolster project planning and to avoid potential for "take" among threatened and/or endangered species.

Burns & McDonnell have obtained an Official Species List through the USFWS Information for Planning and Consultation (IPaC) online service (see **Attachment A**). This request resulted in the identification of the following potential species of interest within the Project area: Northern Longeared Bat (*Myotic septentrionalis*), Tricolored Bat (*Perimyotis septentrionalis*), Piping Plover (*Charadrius melodus*), Rufa Red Knot (*Calidris canutus rufa*), and Monarch Butterfly (*Danaus plexippus*). In addition, Burns & McDonnell has also requested data from NYNHP (submitted March 12, 2025, Submission ID: 9712) (see **Attachment B**). This request is pending NYNHP review as of the date of this letter.

VIA EMAIL: NaturalHeritage@dec.ny.gov New York Natural Heritage Program April 7, 2025 Page 2

Information on the specific locations of species of various concerns identified by the NYNHP will be used to focus future surveys should they be required and guide the project design in an effort to avoid, minimize, or mitigate potential impacts.

Please use the mailing or email address indicated below to send any information or data:

Simone Henry 7 Wells Ave, Suite 27 Newton, MA 02549

Email: shenry2@burnsmcd.com

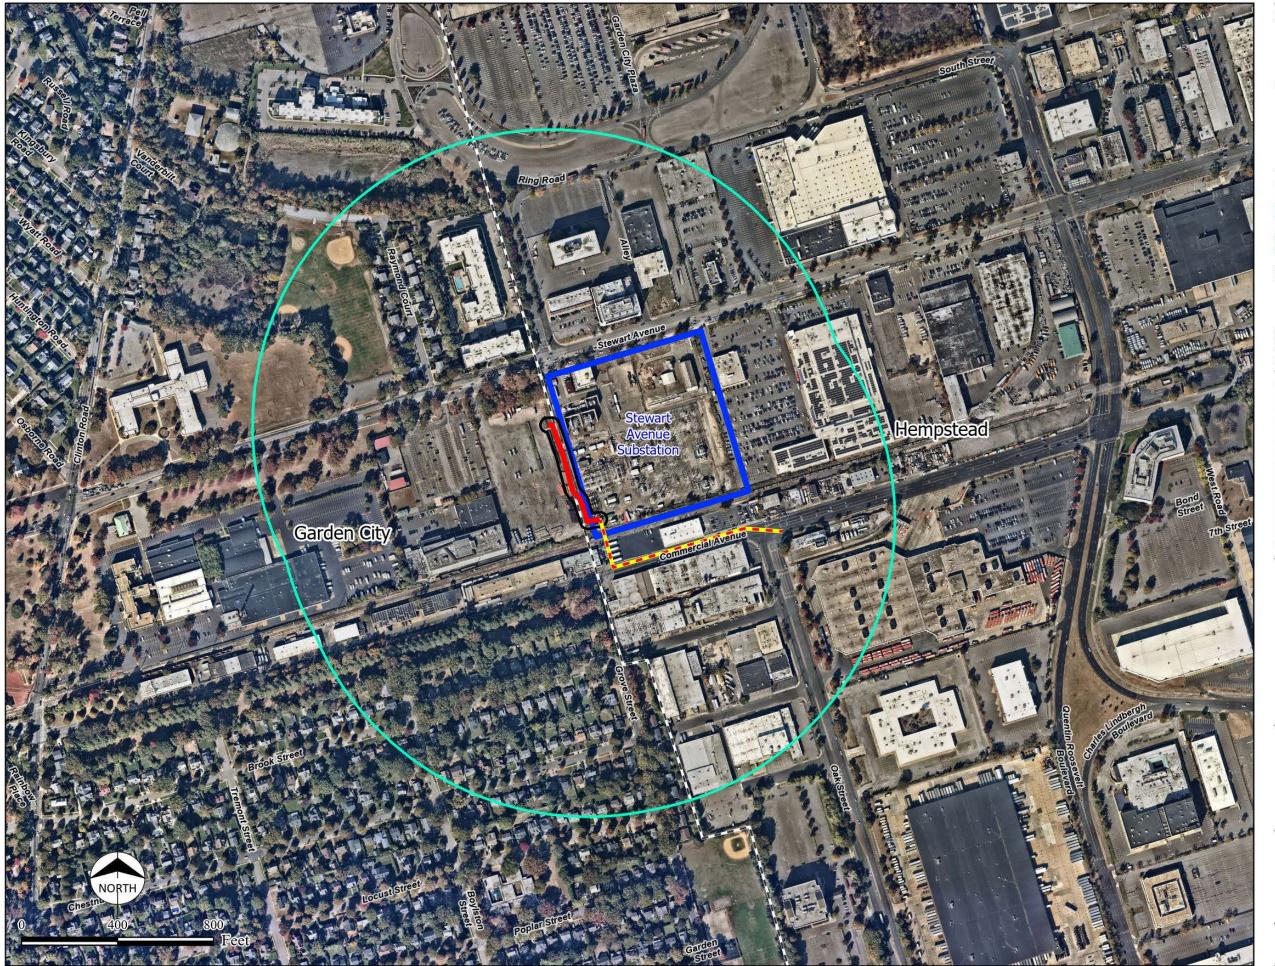

If you have any questions or require additional information, please contact me at (617) 717-4631 or shenry2@burnsmcd.com. Thank you for your assistance with this review.

Sincerely,

Burns & McDonnell E.G.S.

Simone Henry Environmental Scientist

Information for Planning and Consultation Official Species List

United States Department of the Interior

FISH AND WILDLIFE SERVICE

Long Island Ecological Services Field Office 340 Smith Road Shirley, NY 11967-2258 Phone: (631) 286-0485 Fax: (631) 286-4003

In Reply Refer To: 03/06/2025 14:04:12 UTC

Project Code: 2025-0064876

Project Name: Newbridge Bypass Amendment

Subject: List of threatened and endangered species that may occur in your proposed project

location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

Project code: 2025-0064876

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Attachment(s):

Official Species List

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

Long Island Ecological Services Field Office 340 Smith Road Shirley, NY 11967-2258 (631) 286-0485

PROJECT SUMMARY

Project Code: 2025-0064876

Project Name: Newbridge Bypass Amendment

Project Type: Transmission Line - Maintenance/Modification - Below Ground Project Description: The proposed amendment would extend Line 138-467 to a new

termination point west of Stewart Avenue Substation, modify Lines 138-467/567 to bypass the Newbridge Substation, and extend Line 138-567at Ruland Road Substation further east on the property to the developer's equipment. The modified line, which now stretches from a new termination point west of Stewart Avenue Substation at the

Uniondale Hub, past Newbridge Substation, to another new termination point within LIPA property east of the Ruland Road Substation, will be

operated at 345 kV and designated as Line 345-567.

At Stewart Avenue Substation, Line 138-467 will be extended by approximately 650 feet to a new termination point at the new Uniondale Hub, which is being developed by another utility. Three identical cables will be installed underground. Line 138-467 will be disconnected from Stewart Avenue Substation and will include pulling of approximately 950 feet of new cable through existing conduit from an existing manhole at the corner of Commercial Avenue and Oak Street.

At Newbridge Substation, a new manhole will be installed just north of the Newbridge Substation in a spare ductbank in the LIPA right-of-way to pull new cable for Line 138-467 from the east and west. This would install approximately 1,500 feet of new cable through an existing ductbank to the west and approximately 1,800 feet of new cable through and existing ductbank to the east.

At Ruland Road Substation, Line 138-567 will be extended approximately 1,400 feet with open-cut trenching to a new termination point at the New Ruland Road Substation, within LIPA property, which is also proposed by another utility.

All work within substations proposed in this amendment is limited to equipment removal.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@40.7334949,-73.54075849120579,14z

Counties: Nassau and Suffolk counties, New York

ENDANGERED SPECIES ACT SPECIES

Project code: 2025-0064876

There is a total of 6 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. <u>NOAA Fisheries</u>, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

NYSDEC

Consultation Request

April 7, 2025

VIA EMAIL: dep.r1@dec.ny.gov

Sherri Aicher Regional Permit Administrator 50 Circle Road Stony Brook, NY 11790-3409

Re: Request for Project Consultation on the Newbridge Bypass Project
Town of Huntington, Suffolk County & Town of Hempstead, Nassau County, New York

Dear Recipient:

On Behalf of PSEG Long Island (PSEG Long Island), as Agent for the Long Island Lighting Company d/b/a LIPA, a wholly owned subsidiary of the Long Island Power Authority, Burns & McDonnell E.G.S. (Burns & McDonnell) request NYSDEC data to be utilized to site a project that will modify existing lines to bypass a substation and extend it to substation expansions on either end (Project). Work associated with the Project will occur at and adjacent to two substations in the Town of Hempstead in Nassau County and at and adjacent to a substation in the Town of Huntington in Suffolk County. A Project area location map is included as **Figure 1**.

The Project will be subject to New York State Public Service Law as an amendment to existing facilities certified under Article VII. We are submitting this project review package for technical assistance to bolster project planning and to avoid potential impact on state regulated wetlands and species.

Based on publicly available data from USWFS NWI mapping, NYSDEC Previously Mapped Freshwater Wetlands, and NYSDEC Informational Freshwater Wetland Mapping, there are no federal or state water resources present directly in the Amendment ROW. However, wetlands identified through NWI are within 0.25 miles of the Project, as shown in **Figure 2**. Field investigations are planned to occur in spring or summer of 2025 to confirm the presence or absence of wetlands and water resources within the area of the Project.

Based on an Official Species List through the USFWS Information for Planning and Consultation (IPaC) online service (see **Attachment A**). This request resulted in the identification of the following potential species of interest within the Project area: Northern Long-eared Bat (*Myotic septentrionalis*), Tricolored Bat (*Perimyotis septentrionalis*), Piping Plover (*Charadrius melodus*), Rufa Red Knot (*Calidris canutus rufa*), and Monarch Butterfly (*Danaus plexippus*). In addition, Burns

VIA EMAIL: dep.r1@dec.ny.gov Regional Permit Administrator April 7, 2025 Page 2

& McDonnell has also requested data from NYNHP (submitted March 12, 2025, Submission ID: 9712) (see **Attachment B**). This request is pending NYNHP review as of the date of this letter.

PSEG Long Island anticipates tree clearing outside of Newbridge Substation and Ruland Road Substation to accommodate the bypassing the Newbridge Substation and the extension at Ruland Road Substation. Tree trimming may also be required to accommodate the installation. PSEG Long Island is committed to working with relevant agencies to prevent impacts to possible Northern Longeared Bats in the area. Coordination with NYSDEC will be conducted, as required, prior to clearing. A restoration plan will be developed as part of the Project.

Information provided by NYSDEC will be used to focus future surveys should they be required and guide the project design in an effort to avoid, minimize, or mitigate potential impacts.

Please use the mailing or email address indicated below to send any information or data:

Information for Planning and Consultation Official Species List

United States Department of the Interior

FISH AND WILDLIFE SERVICE

Long Island Ecological Services Field Office 340 Smith Road Shirley, NY 11967-2258 Phone: (631) 286-0485 Fax: (631) 286-4003

In Reply Refer To: 03/06/2025 14:04:12 UTC

Project Code: 2025-0064876

Project Name: Newbridge Bypass Amendment

Subject: List of threatened and endangered species that may occur in your proposed project

location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

Project code: 2025-0064876

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Attachment(s):

Official Species List

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

Long Island Ecological Services Field Office 340 Smith Road Shirley, NY 11967-2258 (631) 286-0485

PROJECT SUMMARY

Project Code: 2025-0064876

Project Name: Newbridge Bypass Amendment

Project Type: Transmission Line - Maintenance/Modification - Below Ground Project Description: The proposed amendment would extend Line 138-467 to a new

termination point west of Stewart Avenue Substation, modify Lines 138-467/567 to bypass the Newbridge Substation, and extend Line 138-567at Ruland Road Substation further east on the property to the developer's equipment. The modified line, which now stretches from a new termination point west of Stewart Avenue Substation at the

Uniondale Hub, past Newbridge Substation, to another new termination point within LIPA property east of the Ruland Road Substation, will be

operated at 345 kV and designated as Line 345-567.

At Stewart Avenue Substation, Line 138-467 will be extended by approximately 650 feet to a new termination point at the new Uniondale Hub, which is being developed by another utility. Three identical cables will be installed underground. Line 138-467 will be disconnected from Stewart Avenue Substation and will include pulling of approximately 950 feet of new cable through existing conduit from an existing manhole at the corner of Commercial Avenue and Oak Street.

At Newbridge Substation, a new manhole will be installed just north of the Newbridge Substation in a spare ductbank in the LIPA right-of-way to pull new cable for Line 138-467 from the east and west. This would install approximately 1,500 feet of new cable through an existing ductbank to the west and approximately 1,800 feet of new cable through and existing ductbank to the east.

At Ruland Road Substation, Line 138-567 will be extended approximately 1,400 feet with open-cut trenching to a new termination point at the New Ruland Road Substation, within LIPA property, which is also proposed by another utility.

All work within substations proposed in this amendment is limited to equipment removal.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@40.7334949,-73.54075849120579,14z

Counties: Nassau and Suffolk counties, New York

ENDANGERED SPECIES ACT SPECIES

Project code: 2025-0064876

There is a total of 6 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. <u>NOAA Fisheries</u>, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

To: Henry, Simone

Subject: Confirmation of your submitted request to New York Natural Heritage

Submission ID: 9712

Submitted on Wednesday, March 12, 2025 - 15:44 Submitted values are:

Company, Organization, or Agency: Burns & McDonnell EGS Requestor Name: Simone Henry Requestor Address (Street/PO Box): 7 Wells Ave Requestor City: Newton Centre Requestor State: Massachusetts Requestor Zip Code: 02459 Requestor Telephone #: 6177174631 Requestor Email: shenry2@burnsmcd.com Project Type: electric utility/transmission line Project Name: Newbridge Bypass Amendment Project Applicant: PSEG Long Island LLC Project County:

- Nassau
- Suffolk

Town (Nassau County): Hempstead Town (Suffolk County): Huntington

Project Summary: The project includes modifying existing lines to bypass a substation and extend it to new substations adjacent to existing ones on either end (Project). Work associated with the Project will occur at and adjacent to two substations in the Town of Hempstead in Nassau County and at and adjacent to a substation in the Town of Huntington in Suffolk County.

Current Land Use: All earth disturbance is planned to occur within existing substation (LIPA-owned) properties. At the first substation, the land is developed. At the second and third substation, the land is vegetated and forested but has likely been previously disturbed given the surrounding commercial and industrial uses.

Tax parcel number:

Latitude:

Longitude:

Street Address and City of Project:

Project Notes: PSEG Long Island is committed to restricting tree clearing associated with the proposed Project to the permissible clearing window between December 1 to February 28 of any given year to prevent impacts to possible Northern Long-eared Bats in the area. Coordination with NYSDEC will be conducted, as required, prior to clearing. A restoration plan will be developed as part of the Project.

USFWS

Consultation Request

April 7, 2025

VIA EMAIL: FW5ES_NYFO@fws.gov

Long Island Ecological Services Field Office U.S. Fish and Wildlife Service Long Island Field Office 340 Smith Road Shirley, NY 11967-2258

Re: Request for Project Consultation on the Newbridge Bypass Project
Town of Huntington, Suffolk County & Town of Hempstead, Nassau County, New York

Dear Recipient:

On behalf of PSEG Long Island (PSEG Long Island), as Agent for the Long Island Lighting Company d/b/a LIPA, a wholly owned subsidiary of the Long Island Power Authority, Burns & McDonnell E.G.S. (Burns & McDonnell) request USFWS data to be utilized to site a project that will modify existing lines to bypass a substation and extend it to substation expansions on either end (Project). Work associated with the Project will occur at and adjacent to two substations in the Town of Hempstead in Nassau County and at and adjacent to a substation in the Town of Huntington in Suffolk County. A Project area location map is included as **Figure 1**.

PSEG Long Island anticipates tree clearing and trimming outside of Stewart Avenue Substation, Newbridge Substation and Ruland Road Substation to accommodate the Project. PSEG Long Island is committed to working with relevant agencies to prevent impacts to possible Northern Long-eared Bats in the area. Coordination with New York Department of Environmental Conservation (NYSDEC) will be conducted, as required, prior to clearing. A restoration plan will be developed as part of the Project.

The Project will be subject to New York State Public Service Law as an amendment to existing facilities certified under Article VII. We are submitting this project review package for technical assistance to bolster project planning and to avoid potential for "take" among threatened and/or endangered species.

Burns & McDonnell has obtained an Official Species List through the USFWS Information for Planning and Consultation (IPaC) online service (see **Attachment A**). This request resulted in the identification of the following potential species of interest within the Project area: Northern Longeared Bat (*Myotic septentrionalis*), Tricolored Bat (*Perimyotis septentrionalis*), Piping Plover (*Charadrius melodus*), Rufa Red Knot (*Calidris canutus rufa*), and Monarch Butterfly (*Danaus plexippus*). In addition, state coordination will be conducted via consultation with the New York

VIA EMAIL: FW5ES_NYFO@fws.gov U.S. Fish and Wildlife Service April 7, 2025 Page 2

Natural Heritage Program (NYNHP). This request is pending NYNHP review as of the date of this letter.

The information provided by USFWS will be used to evaluate the Project and potential alternative routes within the Project area. Information on the specific locations of species of various concerns identified by the USFWS will also be used to focus future field surveys and guide the project design in an effort to avoid, minimize, or mitigate potential impacts.

Please use the mailing or email address indicated below to send any information or data:

Simone Henry 7 Wells Ave, Suite 27 Newton, MA 02549

Email: shenry2@burnsmcd.com

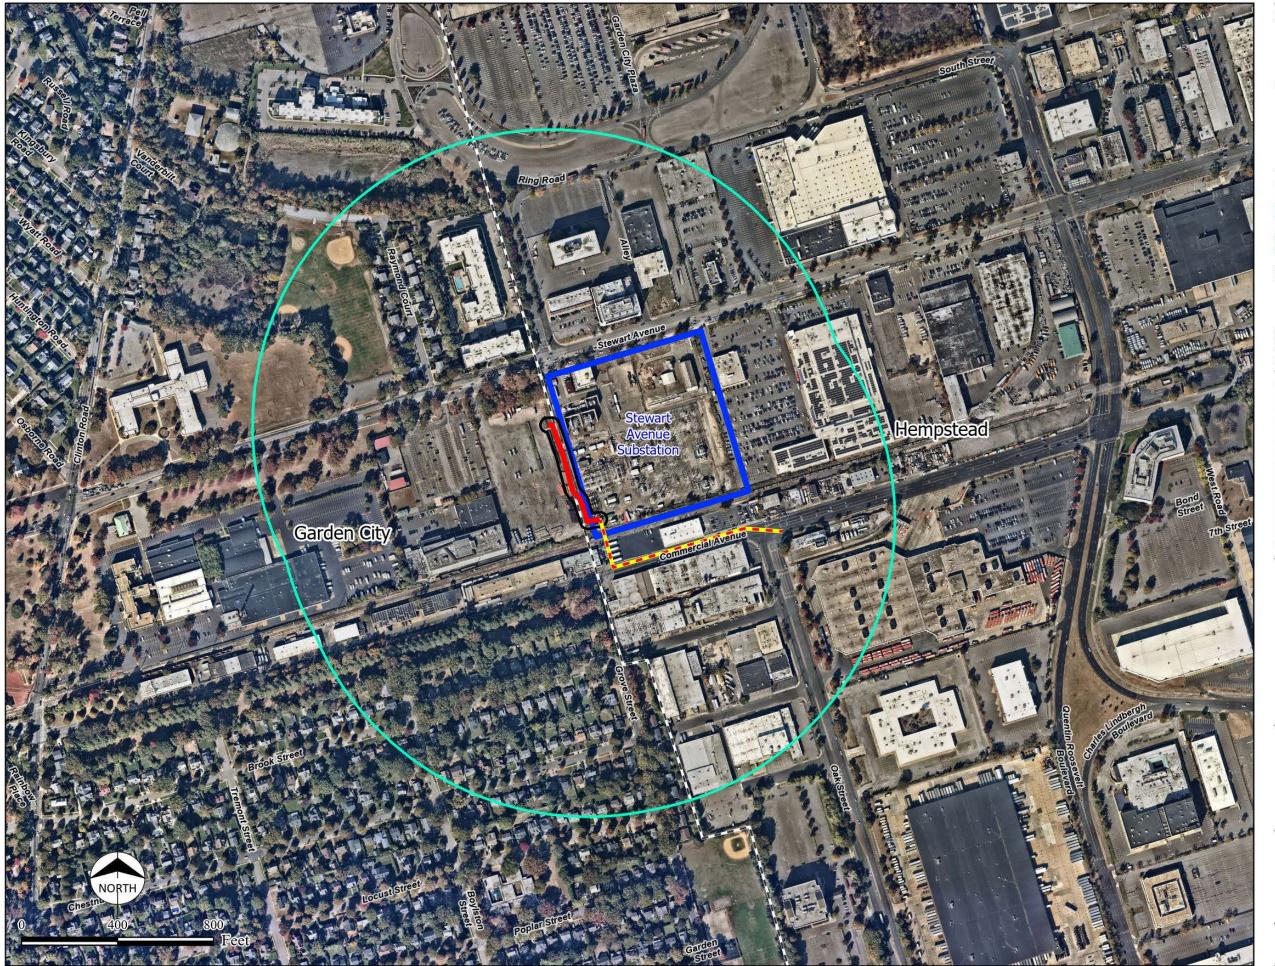

If you have any questions or require additional information, please contact me at (617) 717-4631 or shenry2@burnsmcd.com. Thank you for your assistance with this review.

Sincerely,

Burns & McDonnell E.G.S.

Simone Henry

Information for Planning and Consultation Official Species List

United States Department of the Interior

FISH AND WILDLIFE SERVICE

Long Island Ecological Services Field Office 340 Smith Road Shirley, NY 11967-2258 Phone: (631) 286-0485 Fax: (631) 286-4003

In Reply Refer To: 03/06/2025 14:04:12 UTC

Project Code: 2025-0064876

Project Name: Newbridge Bypass Amendment

Subject: List of threatened and endangered species that may occur in your proposed project

location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

Project code: 2025-0064876

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Official Species List

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

Long Island Ecological Services Field Office 340 Smith Road Shirley, NY 11967-2258 (631) 286-0485

PROJECT SUMMARY

Project Code: 2025-0064876

Project Name: Newbridge Bypass Amendment

Project Type: Transmission Line - Maintenance/Modification - Below Ground Project Description: The proposed amendment would extend Line 138-467 to a new

termination point west of Stewart Avenue Substation, modify Lines 138-467/567 to bypass the Newbridge Substation, and extend Line 138-567at Ruland Road Substation further east on the property to the developer's equipment. The modified line, which now stretches from a new termination point west of Stewart Avenue Substation at the

Uniondale Hub, past Newbridge Substation, to another new termination point within LIPA property east of the Ruland Road Substation, will be

operated at 345 kV and designated as Line 345-567.

At Stewart Avenue Substation, Line 138-467 will be extended by approximately 650 feet to a new termination point at the new Uniondale Hub, which is being developed by another utility. Three identical cables will be installed underground. Line 138-467 will be disconnected from Stewart Avenue Substation and will include pulling of approximately 950 feet of new cable through existing conduit from an existing manhole at the corner of Commercial Avenue and Oak Street.

At Newbridge Substation, a new manhole will be installed just north of the Newbridge Substation in a spare ductbank in the LIPA right-of-way to pull new cable for Line 138-467 from the east and west. This would install approximately 1,500 feet of new cable through an existing ductbank to the west and approximately 1,800 feet of new cable through and existing ductbank to the east.

At Ruland Road Substation, Line 138-567 will be extended approximately 1,400 feet with open-cut trenching to a new termination point at the New Ruland Road Substation, within LIPA property, which is also proposed by another utility.

All work within substations proposed in this amendment is limited to equipment removal.

Northern Long-eared Bat Myotis septentrionalis

Endangered

No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/9045

Tricolored Bat Perimyotis subflavus

Proposed

No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/10515 Endangered

BIRDS

STATUS NAME

Piping Plover Charadrius melodus

Threatened

Population: [Atlantic Coast and Northern Great Plains populations] - Wherever found, except those areas where listed as endangered.

There is **final** critical habitat for this species. Your location does not overlap the critical habitat.

Species profile: https://ecos.fws.gov/ecp/species/6039

Rufa Red Knot Calidris canutus rufa

Threatened

There is **proposed** critical habitat for this species. Your location does not overlap the critical

habitat.

Species profile: https://ecos.fws.gov/ecp/species/1864

INSECTS

NAME **STATUS**

Monarch Butterfly *Danaus plexippus*

Proposed

There is **proposed** critical habitat for this species. Your location does not overlap the critical

habitat.

Species profile: https://ecos.fws.gov/ecp/species/9743

Threatened

FLOWERING PLANTS

NAME **STATUS**

Sandplain Gerardia *Agalinis acuta*

Endangered

No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/8128

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

Project Code: 2025-0064876

Project Name: Newbridge Bypass Amendment

Subject: List of threatened and endangered species that may occur in your proposed project

location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

Project code: 2025-0064876

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Official Species List

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

Long Island Ecological Services Field Office 340 Smith Road Shirley, NY 11967-2258 (631) 286-0485

PROJECT SUMMARY

Project Code: 2025-0064876

Project Name: Newbridge Bypass Amendment

Project Type: Transmission Line - Maintenance/Modification - Below Ground Project Description: The proposed amendment would extend Line 138-467 to a new

termination point west of Stewart Avenue Substation, modify Lines 138-467/567 to bypass the Newbridge Substation, and extend Line 138-567at Ruland Road Substation further east on the property to the developer's equipment. The modified line, which now stretches from a new termination point west of Stewart Avenue Substation at the

Uniondale Hub, past Newbridge Substation, to another new termination point within LIPA property east of the Ruland Road Substation, will be

operated at 345 kV and designated as Line 345-567.

At Stewart Avenue Substation, Line 138-467 will be extended by approximately 650 feet to a new termination point at the new Uniondale Hub, which is being developed by another utility. Three identical cables will be installed underground. Line 138-467 will be disconnected from Stewart Avenue Substation and will include pulling of approximately 950 feet of new cable through existing conduit from an existing manhole at the corner of Commercial Avenue and Oak Street.

At Newbridge Substation, a new manhole will be installed just north of the Newbridge Substation in a spare ductbank in the LIPA right-of-way to pull new cable for Line 138-467 from the east and west. This would install approximately 1,500 feet of new cable through an existing ductbank to the west and approximately 1,800 feet of new cable through and existing ductbank to the east.

At Ruland Road Substation, Line 138-567 will be extended approximately 1,400 feet with open-cut trenching to a new termination point at the New Ruland Road Substation, within LIPA property, which is also proposed by another utility.

All work within substations proposed in this amendment is limited to equipment removal.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@40.7334949,-73.54075849120579,14z

Counties: Nassau and Suffolk counties, New York

ENDANGERED SPECIES ACT SPECIES

Project code: 2025-0064876

There is a total of 6 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. <u>NOAA Fisheries</u>, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.
